

TUSKER THERMAL SOLUTIONS – GEM 900

Description

Tusker GEM900 is a medium duty textured glass fabric with an aluminised coating, mainly used in the thermal insulation field where radiant heat protection is required. Protects from contamination by corrosive liquids and withstands continuous temperatures up to 400°C.

Application and Advantages

- Heat reflection
- Heat retention blankets
- Welding curtains
- Radiant heat protection
- Temperature resistance
- Protects against corrosive liquids
- Good thermal protection

Specification

- Glass fabric
- Textured FORTAGLAS™ fabrics has been designed to offer greater thermal protection due to their lofted nature
- Reflective aluminium foil for insulation
- Withstands continuous temperatures up to 400°C and short term temperatures of up to 600°C
- Conforms to EN532 flammability test.

Properties

Weight 1000g/m² nominal
Thickness 1.3mm nominal

Sizes

1m (3ft 3") x 1m (3ft 3")
1m (3ft 3") x 2m (6ft 6")
2m (6ft 6") x 2m (6ft 6")
2m (6ft 6") x 3m (10ft)
(other sizes can be made on request)
